

yourCIO at work for you

Connecting your practice with technology

yourCIO is an innovative service for physicians to help manage their Information Technology services. We become your Chief Information Officer. We oversee all of your data technology, freeing the medical staff to do their jobs.

System integration and data management is largest none medical issue facing practices today. They can also, have the biggest impact on a practices bottom line.

CIO Support

flexible solutions for your practice needs

EMR Systems

With so many choices for EMR systems, it is difficult to assess what is right for your practice. Antidote helps qualify, negotiate and implement EMR systems

Custom Software Development

Antidote provides software development not only for your desktop, but also on your iPad and iPhone. Access to patient information when you need it.

Network Infrastructure

We work in coordination with your network support staff (internal or external) to provide you best possible solutions.
